Title: ELECTRONICS TECHNICIAN

GENERAL STATEMENT OF DUTIES: Performs skilled electronic work in the installation, maintenance, diagnosis, and repair of electronic and ancillary electric equipment.

DISTINGUISHING FEATURES OF THE CLASS: An employee in this class installs, maintains, inspects, adjusts, and repairs electronic equipment. The employee responds to problems in the field, investigates and, when possible, takes immediate action to correct the problem. The employee supervises the work of electrical and electronic personnel in the field. The incumbent receives general supervision but exercises considerable independent judgment in executing assignments.

EXAMPLES OF WORK: (Illustrative Only)

- Installs electronic equipment and electronic circuitry such as flowmeters, telemetry circuits, engine generator controls, electronic drives, security systems, and other related equipment;
- Operates and diagnoses failures in electronic systems and circuitry;
- Repairs electronic circuitry as required;
- Programs and operates computerized telemetry systems for pumping stations and wastewater treatment plants;
- Uses diagnostic equipment such as wattmeter, vacuum tube voltmeter, oscilloscope, megger, and other related equipment;
- Promotes an ongoing attitude of dedication to excellent public service and ensures that external and internal customers are provided with the highest quality of service;
- Operates a personal computer and other related equipment in the course of the work.

REQUIRED KNOWLEDGE, SKILLS, AND ABILITIES: Thorough knowledge of the theory and principles of electronics and electrical work; thorough knowledge of NEC and NFPA 70E; thorough knowledge of the use of electronic diagnostic instruments such as the oscilloscope, volt-ohmmeter, and megger; ability to read and understand comprehensive electronic schematic drawings; ability to work safely in a hazardous environment; ability to understand and to carry out difficult written instructions; ability to establish and maintain effective working relations with co-workers; ability to communicate courteously and effectively, both verbally and in writing.
MINIMUM QUALIFICATIONS: Possession of a State of Delaware Master Electrician’s license and at least two (2) years of experience working as a Master Electrician, including at least one (1) year of experience performing skilled electronics work after successful completion of a State Registered Apprenticeship Program; and possession of a trade school or high school diploma or GED.

ADDITIONAL REQUIREMENTS: Possession of a valid Delaware Class D driver’s license or its equivalent. Must maintain State of Delaware Master Electrician’s license. Must pass a Class III County physical examination and background check; must perceive the full range of the color spectrum.
